EDUCATION

California State University, Sacramento
B.S. in Computer Science

Aug 2023- May 2027
GPA: 3.536

PROJECTS

TalentPulse AI (AI Resume Screening Assistant)

- Developed an AI-powered recruitment assistant using Python, advanced NLP, and Machine Learning to automate end-to-end resume screening, parsing and candidate evaluation workflows.
- Architected an ETL data pipeline that ingests multi-format PDF resumes, extracts raw text using PyPDF2, cleans and executes preprocessing pipelines on it, and ranks candidates based on job description relevance.
- Engineered a hybrid semantic-scoring engine combining TF-IDF vectorization and cosine similarity matrices for precise skill and keyword extraction, increasing matching efficiency for top-tier candidates.
- Built an asynchronous AI-driven interview integrating automated speech-to-text, NLU and Voice Activity Detection Models alongside sentiment analysis to evaluate communication efficacy and behavioral cues.
- Optimized the talent acquisition funnel by engineering an automated shortlisting algorithm that surfaces the top 10 candidates, effectively reducing manual screening while establishing a data-driven baseline for hiring.

Tic Tac Toe App

- Developed an OOP-based python game with an AI opponent and different difficulty levels.
- Used Bitwise Operations for improved performance and better gameplay experience.
- Reduced AI compute overhead by caching previously calculated game states, successfully eliminating redundant calculations through memoization techniques.

PROFESSIONAL EXPERIENCE

IT Student Assistant – University System of Georgia, Athens GA

June 2026 – Present

- Diagnosed and remediated critical hardware, software, and network failures, performing root-cause analysis to minimize system downtime and maintain high operational availability for end-users.
- Administered Identity and Access Management workflows, managing user provisioning, group policies, access permissions, and Active Directory object mutations in strict compliance with IT security protocols.
- Provisioned, configured, and deployed enterprise computing equipment, leveraging asset management frameworks to track the lifecycle of digital infrastructure and corporate hardware inventory.
- Managed the lifecycle of technical support tickets within an enterprise ITSM platform, analyzing incident trends to optimize SLAs (Service Level Agreements) and streamline response efficiency.

Food Service Worker – Aramark, Sacramento CA

Aug 2023 – May 2026

- Led cross-functional team workflows and resolved operational bottlenecks under high-pressure conditions, fostering a collaborative, high-performance environment to optimize daily campus restaurant service.
- Cultivated strong stakeholder communication and practiced active listening to consistently deliver empathetic, client-centric service while managing high-volume sales transactions with precision.

Computer Intern – Shree Bhawal Metals, Delhi India

May 2021– July 2021

- Engineered a centralized digital archiving system to migrate legacy paper filing infrastructure into a structured, indexed, and fully searchable electronic document database.
- Optimized internal data retrieval workflows, implementing logical directory schemas and access controls that significantly reduce system query latency for cross-functional teams.
- Provisioned and maintained local IT infrastructure, providing technical support, troubleshooting hardware and software configurations, and ensuring system uptime across company workstations.

SKILLS

- **Languages-** Python, Java, C, R, SQL, HTML
- **Data Tools-** Pandas, NumPy, Matplotlib, RStudio, Spreadsheets
- **Data Engineering Tools-** ETL Concepts, Data Cleaning, Transformation, Workflow Automation
- **Other-** Databases, Data Structures & Algorithms, Git, Analytical Thinking

CERTIFICATIONS

- Google Data Analytics Professional Certificate — Google/Coursera
